11.	Troubleshooting & FAQ

1. Getting Started — Your First Login

You'll receive an invitation from your association — either a link by email or a code to enter in the app. Once you tap the link or enter the code, you'll be guided through a short setup:

- 1 Create your account (email and password).
- 2 Accept the association's Privacy Policy and Terms & Conditions — this is required before you can use any features.
- 3 Add your children (if applicable) — name, date of birth, and any allergies or medical notes the staff need to know about.
- 4 Upload a medical certificate for each child if your association requires one for check-in.

TIP

Have your children's medical certificates ready as a photo on your phone before starting — the upload takes seconds if the photo is already there.

2. Your Family Dashboard

The dashboard is the home screen you see every time you open Stride. It shows everything relevant to your family today:

Element	What it shows
Next class	The next upcoming class for any of your children, with instructor name, studio, and time.
Your children	Quick cards for each enrolled child — their active courses and schedule.
Upcoming events	Shows, recitals, and special activities coming up.
Wallet	A summary of payments due and recent transactions.

3. The Smart Pass — Your Digital Membership Card

The Smart Pass replaces physical membership cards, sign-in sheets, and paper registers. It is a digital QR code that uniquely identifies your child or yourself, and that an Operator scans at the start of every class to mark attendance.

3.1 Showing the Smart Pass

The Smart Pass is always on your home screen — tap your child's card or your own profile to bring up the full-screen QR code. Simply show it to the Operator's camera to check in.

3.2 Multi-child families

If you have more than one child enrolled, swipe between their cards on the home screen — each child has their own individual QR pass. You don't need to navigate anywhere else; all passes are one swipe apart.

3.3 What the Smart Pass checks automatically

When an Operator scans your child's pass, Stride instantly verifies:

- **Enrolment status** — is the child enrolled in this class?
- **Payment** — is the membership fee up to date?
- **Medical certificate** — is a valid certificate on file?

If anything is out of order, the Operator sees a warning so it can be resolved before it becomes a problem at the door.

3.4 If the scan shows an error

Open the Stride app and tap your child's QR icon — the pass refreshes automatically. Show the refreshed pass to the Operator and try again. If it still fails, the Operator will direct you to the front desk or the Admin.

TIP

The Smart Pass is valid for 24 hours and refreshes automatically while the app is open. You don't need to do anything — just open the app before class and the pass will be ready.

4. Enrolling in Courses & Classes

4.1 Browsing available courses

[Courses & Booking](#) shows all courses available for enrolment at your association. You can filter by age group, discipline, or schedule. Tap any course to see full details: description, instructor, schedule, location, and price.

4.2 Adding to cart and enrolling

- 1 Tap [Enrol](#) on the course you want.
- 2 Select which child (or yourself, for adult courses) to enrol.
- 3 The course is added to your cart — you can add multiple courses before checking out.
- 4 Go to your [Cart](#) to review and pay.

4.3 Waitlist

If a course is full, you can join the waitlist. If a spot becomes available, you'll receive a notification and have a limited time to confirm your enrolment before it moves to the next person on the list.

4.4 Private lessons

Some instructors offer private one-on-one lessons that can be booked separately from group classes. If available, you'll find them under [Book a Private Lesson](#) — you can specify preferred dates and times and the instructor will confirm or suggest alternatives.

4.5 Family discounts

If your association has configured a multi-child discount, it is applied automatically when you check out with more than one child enrolled — you don't need to enter any code. The discount is shown clearly in your cart before you confirm payment.

5. Payments & Wallet

5.1 Making a payment

From your Cart, tap [Checkout](#). Stride uses Stripe for secure card payments — your card details go directly to Stripe's servers and are never stored in the Stride app or your association's systems. You can save a card for future payments to speed up the process.

5.2 Viewing payment history

[Wallet](#) shows a complete history of every payment you've made, with dates and descriptions. You can download individual receipts as PDF directly from here — useful for expense claims or tax records.

5.3 Promo codes

If your association has given you a promo code (for example during a trial period or a marketing campaign), enter it during checkout — the discount is applied automatically before you confirm the payment.

5.4 Payment reminders

Stride sends you automatic reminders before a payment is due so you're never caught off guard. You can also see upcoming payments at any time in your Wallet.

IMPORTANT

If a payment is overdue, your child's Smart Pass check-in will be flagged at the next class — the Operator will see a warning. Contact your association to arrange payment before the next session to avoid any disruption.

6. Documents & Consent

6.1 Required documents

Documents shows every document your association requires — Privacy Policy, Terms & Conditions, and any association-specific consent forms. Documents you have already signed are shown as complete; those still requiring your signature are highlighted.

6.2 Medical certificates

If your association requires a medical certificate for each child, you can upload one directly from this screen. Take a clear photo of the certificate and upload it — the system reads the expiry date automatically. You'll receive a notification before it expires so you can renew in time.

6.3 Signing a document

- 1 Tap the document you need to sign.
- 2 Read through it — you can scroll the full text.
- 3 Sign digitally using your finger in the signature box.
- 4 Confirm — your signed copy is stored automatically for both you and the association.

Each document only needs to be signed once (or again if the association publishes a new version). You will never be asked to re-sign a document you've already accepted unless it has been updated.

7. Your Children's Progress — The Gold Star Diary

Every time an instructor awards your child a Gold Star — for effort, behaviour, achievement, or a special moment in class — you receive an instant notification on your phone. It includes the instructor's personal note, making it a direct, real-time window into your child's experience in class.

7.1 Viewing the Gold Star history

Tap your child's card from the home screen, then open their [Progress Diary](#) . You'll see every star they've earned, with the date, the instructor's name, and their note. It builds into a digital record of your child's journey and achievements over time.

8. Events, Shows & Special Activities

Events shows all upcoming special activities your association has scheduled — end-of-year shows, workshops, open days, and competitions.

- **Location** — every event has a map pin. Tap it to open Google Maps or Apple Maps with directions to the venue, including for locations different from your regular class studio.
 - **Tickets** — some events require a ticket. Tap **Buy Tickets** to purchase directly in the app.
 - **Changes** — if an event is moved or cancelled, you'll receive an automatic push notification immediately.
-

9. Notifications & Communications

9.1 Messages from your association

Messages shows all communications sent to you by your association's Admin or your child's instructor — class updates, reminders, and general announcements.

9.2 Automatic alerts you'll receive

Alert	When it arrives
Class reminder	Before your child's next class — time is set by your association.
Gold Star awarded	The moment an instructor gives your child a star.
Substitute confirmed	If a class is being covered by a different instructor, you're notified in advance with their name and the confirmed time/location.
Class cancelled or moved	Immediate notification if a class is cancelled or rescheduled, with the new details.
Payment due / overdue	Reminder before a payment is due, and alert if it becomes overdue.
Document expiring	Advance notice before a medical certificate or signed document needs renewal.

10. Your Account & Privacy

10.1 Editing your profile

[Account](#) lets you update your name, contact details, profile photo, and emergency contacts. Keep your emergency contact up to date — it's used by staff in the rare event of an incident involving your child.

10.2 Managing your children's profiles

Tap any child's card from the home screen, then [Edit](#) to update their details: allergies, medical notes, emergency contacts, and profile photo. This information is visible to your child's instructors so they can look after them properly.

10.3 Your data & privacy

Stride stores only the data necessary to manage your family's participation in the association. Your data is never sold or shared with third parties. You can request a full export of your data at any time from [Account → Privacy & Data](#). If you leave the association, your data can be deleted on request.

11. Troubleshooting & FAQ

My child's QR code isn't scanning at the door.

Open the Stride app and tap your child's QR icon to refresh the pass, then try again. If it still doesn't work, the instructor or front desk can check whether there's a specific issue (payment overdue, certificate expired) that needs resolving.

I received a notification about a class cancellation — will I get a refund?

This depends on your association's policy. Contact your Admin directly through [Messages](#) to ask — they have full control over refunds and make-up class arrangements.

I can't find the course I want to book.

Courses may not yet be open for enrolment, or your child may not meet the age/level requirements. Contact your Admin if you think there's been an error.

My child was absent from a class but the app shows them as present.

Attendance can only be corrected by the Admin or the Operator who ran the class. Contact your Admin through Messages to request a correction.

I forgot my password.

Tap [Forgot password](#) on the login screen — you'll receive a reset link by email within a minute.
